#### Any burning questions/issues?

What (if anything) have you heard that you want to check out?

Are there any specific, current issues you want to explore with your peers?

#### Topics

- Context setting:
  - Roles & titles
  - Regulation
  - Advanced Practice developments
- RCN Advanced Level Nursing Practice Credentialing

#### What's in a name?

- Inconsistencies in the use of the term 'advanced practice' and a wide range of roles carry the title 'nurse specialist', 'specialist nurse', 'clinical nurse specialist', 'nurse practitioner' and 'advanced nurse practitioner' (Alison Leary: 600 titles)
- ■No agreement or protection of title for clinical nurse specialists or advanced nurse practitioners adding to the plethora of titles and roles
- Inconsistencies in the scope of practice and education and training provision, with potential impact on career progression & patient safety
- Lack of national regulatory framework and standards
- •Plethora of new, similar level clinical disciplines/roles: nurse/clinician/practitioner?

# Emerging roles, regulation & credentialing

#### Regulation v Credentialing v Voluntary Registers

- Why credentialing why not regulation?
- Definitions
- Strengths & limitations

Rapidly changing agenda

#### Regulation

- Purpose: public protection
- Decision to regulate is governmental decision: only considered where there is a compelling case and where other mechanisms e.g., voluntary registers, are not considered sufficient to manage risk
- NMC to regulate nursing associates
  - Requested by Secretary of state; requires change in legislation multiple consultations
  - Standards; Code; fitness to practice; revalidation etc.
  - Challenges: practitioner/professional
- Consultation on regulation of medical associate professions:
  - physician associate (PA)
  - physicians' assistant (anaesthesia) (PA(A))
  - surgical care practitioner (SCP)
  - advanced critical care practitioner (ACCP)

Pre-requisite for some roles = registerable clinical qualification

#### Regulation (2)

DH consultation on regulation of healthcare professionals:

- 32 professions
- 9 regulators
- NMC & HCPC largest regulators (692,550 & 341,745 registrants)

Models of regulation

Number of regulators

#### Credentialing

#### Credentialing:

- Standardisation of the level & range of competence
- Royal College of Emergency Medicine: credentialing framework for Advanced Critical Practitioners in the emergency care setting (nurses, paramedics). Commenced 2016
- Other medical royal colleges exploring: RCAnaethetists
- GMC interest
- Advocated for cosmetic practice

#### Miscellaneous

• Voluntary registers, networks, accreditation

# Multi-professional framework for advanced clinical practice in England

Framework

Definition: Advanced Clinical Practice is delivered by experienced registered healthcare practitioners. It is a level of practice characterised by a high level of autonomy and complex decision-making. This is underpinned by a masters level award or equivalent that encompasses the four pillars of clinical practice, management and leadership, education and research, with demonstration of core and area specific clinical competence.

Advanced Clinical Practice embodies the ability to manage complete clinical care in partnership with patients/carers. It includes the analysis and synthesis of complex problems across a range of settings, enabling innovative solutions to enhance patient experience and improve outcomes.

Advanced Clinical Practitioners Steering Group – framework implementation

# RCN Advanced Level Nursing Practice Credentialing

## What is ALNP Credentialing?

Credentialing is the process of assessing the background and legitimacy of nurses to practice at an advanced level through assessing their:

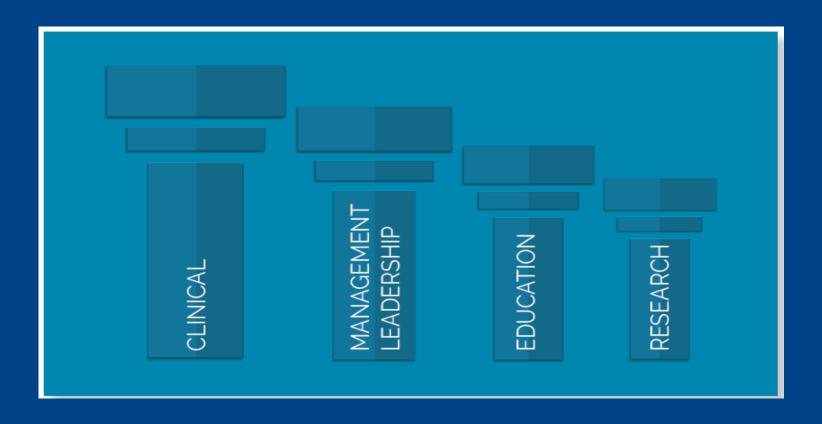

- qualifications,
- experience,
- and competence.

It promotes practice that is in accordance with the four pillars of advanced practice

## Pillars of Advanced Practice

Recognising advanced level practice in nursing www.rcn.org.uk/credentialing

## Why is the RCN doing this?

Drive up standards of practice and skills of nursing profession Nurse - formal recognition of advanced level of practice and creation of advanced career pathway

Employer assurance of the
advanced level of
practice of
nursing staff

Profession –
build upon the
reputation of the
nursing
profession as a
continuously
improving and
high quality
service

Public confidence and
assurance in the
continuing
development,
capability and
professionalism
of their nurses

Recognising advanced level practice in nursing www.rcn.org.uk/credentialing

## Builds on existing work

The work builds on, and strengthens, thinking in each of the four home countries. We have reviewed:

- NHS Wales Advanced Practice Framework (2010),
- NHS Scotland Advanced Nurse Practice Toolkit (2011),
- Department of Health Advanced Level Practice : A Position Statement (2010),
- Northern Ireland Supporting Advanced Practice in Health and Social Care (2014).

#### RCN definition of Advanced Practice

As a body concerned with the developing profession we define Advanced Practice as:

"Advanced practice is a level of practice, rather than a type of practice. Advanced Nurse Practitioners are educated at Masters Level in advanced practice and have been assessed as competent in practice using their expert knowledge and skills. They have the freedom and authority to act, making autonomous decisions in the assessment, diagnosis and treatment of patients."

## Work to date

- APCAG advisory group convened with key external and four country representation
- Task & finish group explored models, approaches and practices
- Designed transitional arrangements for non- Masters advanced level nurses
- Test cohort launched Nov 2016 to Jan 2017 and Early Adopters in May 2017
- Full Launch in May 2017
- Organisational use

Recognising advanced level practice in nursing www.rcn.org.uk/credentialing

### Criteria for the credential

- Registered with the NMC
- Relevant Masters degree.
- Prescribing rights.
- Experience and competence mapped against the 4 pillars of advanced practice.
- Work plan and clinical reference.
- Evidence of CPD over previous 3 years.

## Transitional arrangements

- Until December 2020 nurses who don't meet the above criteria can apply.
- There are a series of "models" against which experience, competence & education can be mapped.
- These will be assessed on an individual basis.

#### Assessment

- Every applicant's submission will be assessed by an external assessor selected by the RCN against strict criteria.
- There will be a moderation process undertaken by a different group of assessors

## Credential renewal

- The initial credential is for 3 years.
- There is a fee for the credential -£275.00
- After this time renewal is required; there is a fee for renewal - £125.00

#### Final slide

Any remaining comments, questions?
