Royal Free HIV Cohort

- Where are we: Hampstead North London:
- Ian Charleson Day Centre (ICDC)
- Numbers of patients 3324
- On HIV treatment 96%
- HIV viral load undetectable 91%

Royal Free HIV Cohort

ICDC Cohort – 2441(73%)Male/ 883(27%)Female Black African – 785 (24%) White British – 1196 (36%)

HIV CNS supported – 68 (57%)Male/ 52(43%) Female Black African – 45 (36%) White British – 28 (23%)

world class expertise ┿ local care

HIV CNS service-provides

- Hospital based: in/outpatient and community
- Brief intervention
- Multi-agency engagement
- Case management
- Onward referral

HIV CNS led service goals

- Support patients achieve better health
- Improve patients ARV adherence
- Proactive patient management- hospital admission avoidance
- Promote patient engagement and retention

HIV CNS -supports patients

- Complex
- Late presenters
- Hard to reach
- Comorbidities
- Mental health challenges
- Drug and alcohol dependency
- Housing/immigration/ social
- Ageing (over 50)

HIV CNS approach to care

- Patient centred, bespoke, holistic engagement
- MDT based (ward, clinic, doctor, pharmacist, psychologist)
- Team of two HIV specialist nurses
- Autonomous
- Flexible
- Creative

HIV CNS supported patients

- Where are our patients, North London: Camden, Barnet, Enfield, Haringey, London wide
- 120 patients from the Royal Free cohort
- Numbers on treatment 99%
- Numbers undetectable 74%

world class expertise 💠 local care

Factors affecting treatment Adherence

- Cognitive impairment
- Physical challenges
- Polypharmacy
- Health beliefs and attitudes
- Many strategies
- Medication aids
- Brief motivational interviewing approach

Evaluation 2017

- Evaluate HIV CNS service/ ongoing audit
- Measure one outcome, used HIV viral load
- 40 patients were managed with use of medication aid
- What is the medication aid (dossett box)

world class expertise 💠 local care

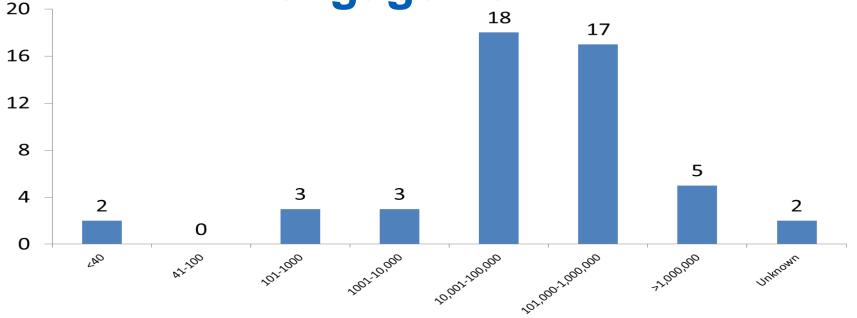

Medication aid/ dossett box

world class expertise 💠 local care

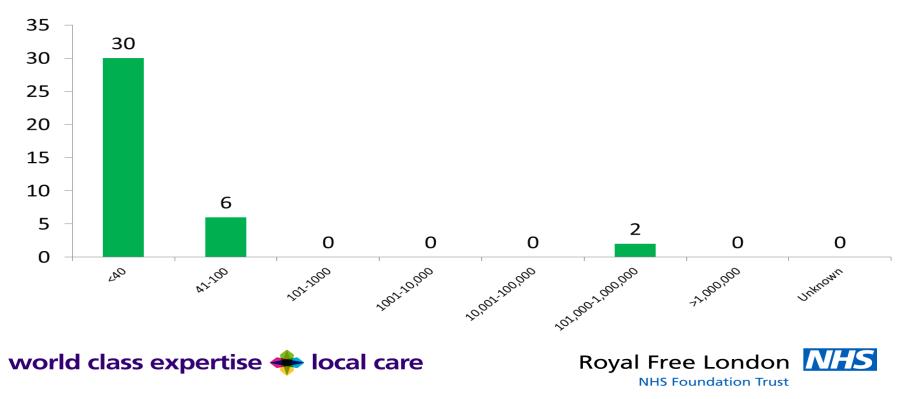

HIV Viral load pre HIV CNS engagement

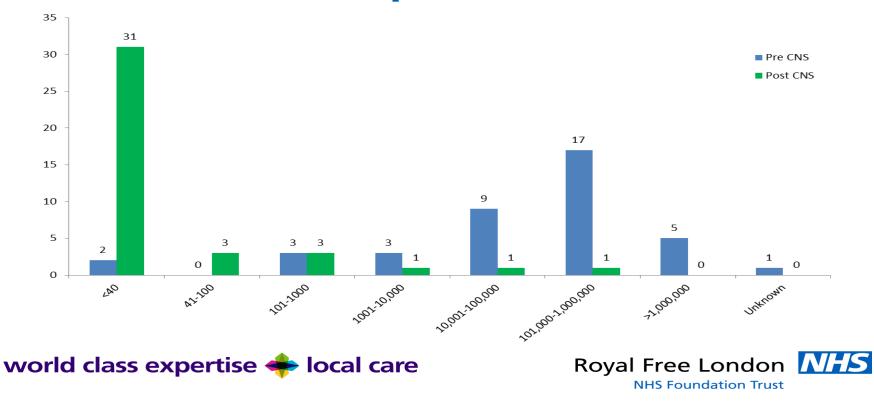

world class expertise 🔶 local care

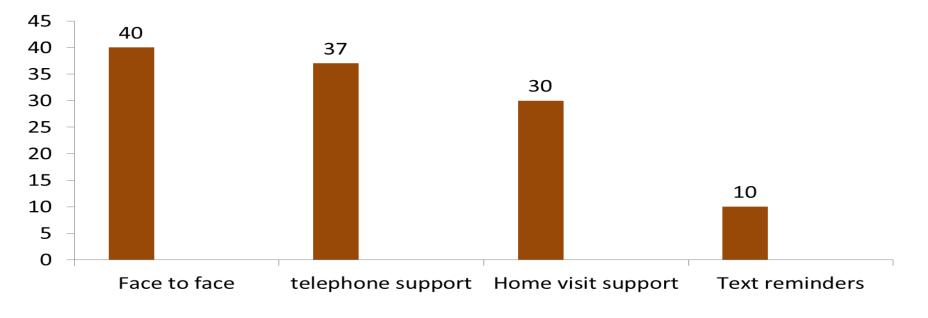

HIV Viral load post HIV CNS engagement

Pre and post HIV CNS engagement comparison

Strategies used by HIV CNS

world class expertise 💠 local care

Strategies used by HIV CNS

- Face to Face monthly pill box provision
- Phone support
- Home visit
- Text reminders
- Clinic engagement
- Case management
- Using brief motivational interviewing strategies

Motivational interviewing strategies

Motivational interviewing is a collaborative person centred conversation style to elicit and strengthen motivation for change

Nurse Approach to support

- Collaborative person centred-autonomous
- Open ended questions
- Unconditional positive regard
- Non-judgemental empathetic- motivation to change
- Understanding patients values and goals
- Advice/ information- patient focused

Questions to patients

- What do you want?
- What are your reasons to change- take meds?
- How could you do this?
- What could help you take the tablets?
- How has your week been?
- How do you think its going? (adherence)
- If missed/ why do you think you missed?

Outcomes

- Improved Adherence
- Improved Engagement
- Avoidance of Hospital admission
- Reduced HIV transmission
- Improved cost effectiveness

Case A

- Diagnosed HIV positive 2010, HIV VL 137,572 copies
- Mental health disorder-alcohol and gambolling addiction, angry, self stigma, chaotic lifestyle and poor engagement
- HIV CNS intervention
- Engagement with regular contact: clinic, phone, home visits, GP, psychiatrists, psychologists
- Weekly phone contact, MDT, medication aid
- Engaged 100% undetectable viral load,
- Patient centred, trust with HIV CNS, still some chaos.

world class expertise 💠 local care

Key to success

- Individually tailored-patient focussed
- HIV CNS interaction and skilled support
- Creative and flexible
- Persistence long-term engagement
- Use of medication aid
- Promoting independence

Way forward

- Research: explore other components effecting behaviour change
- Further audit and evaluation of HIV CNS service

Thank you

- Acknowledgment to the patients
- Royal Free HIV team
- Dr Fiona Burns
- Pharmacy team
- Professor Margaret Johnson
- Joel Paparello
