Conflict of interest

In the last 36 months I have given talks supported by Gilead and ViiV and been on a ViiV advisory panel. I am PI on trials funded by GSK. I hold research grants from the NIHR and BHIVA. I have committee roles with BASHH, BHIVA and NICE.

Objectives

- 1 Overview of contraception
- 2 Contraceptive methods
- 3 Contraception & reproductive life
- 4 Cervical screening
- 5 Sexual dysfunction

Unplanned pregnancy

UK unplanned
pregnancies

Risk for Black
women dying
in pregnancy &
childbirth

Black African
women

Method of contraception

UKMEC

CONDITION	Cu-IUD	LNG-IUS	IMP	DMPA	POP	CHC
I = Initiation, C = Continuation						

HIV INFECTION							
HIV infection							
a) High risk of HIV infection	1	1	1	1	1	1	1
b) HIV infected							
(i) CD4 count ≥ 200 cells/mm ³	2	2	1	1	1	1	1
(ii) CD4 count < 200 cells/mm ³	I	C	I	C	1	1	1
	3	2	3	2			
c) Taking antiretroviral (ARV) drugs	Certain ARV drugs have the potential to affect the bioavailability of steroid hormones in hormonal contraception. For up-to-date information on the potential drug interactions between hormonal contraception and ARV drugs, please refer to the online HIV drugs interaction checker (www.hiv-druginteractions.org/Interactions.aspx).

Post-partum contraception

1/13 access abortion services within 1 year of childbirth

Risks of inter-pregnancy interval <12 months

50% having sex by 6 week check

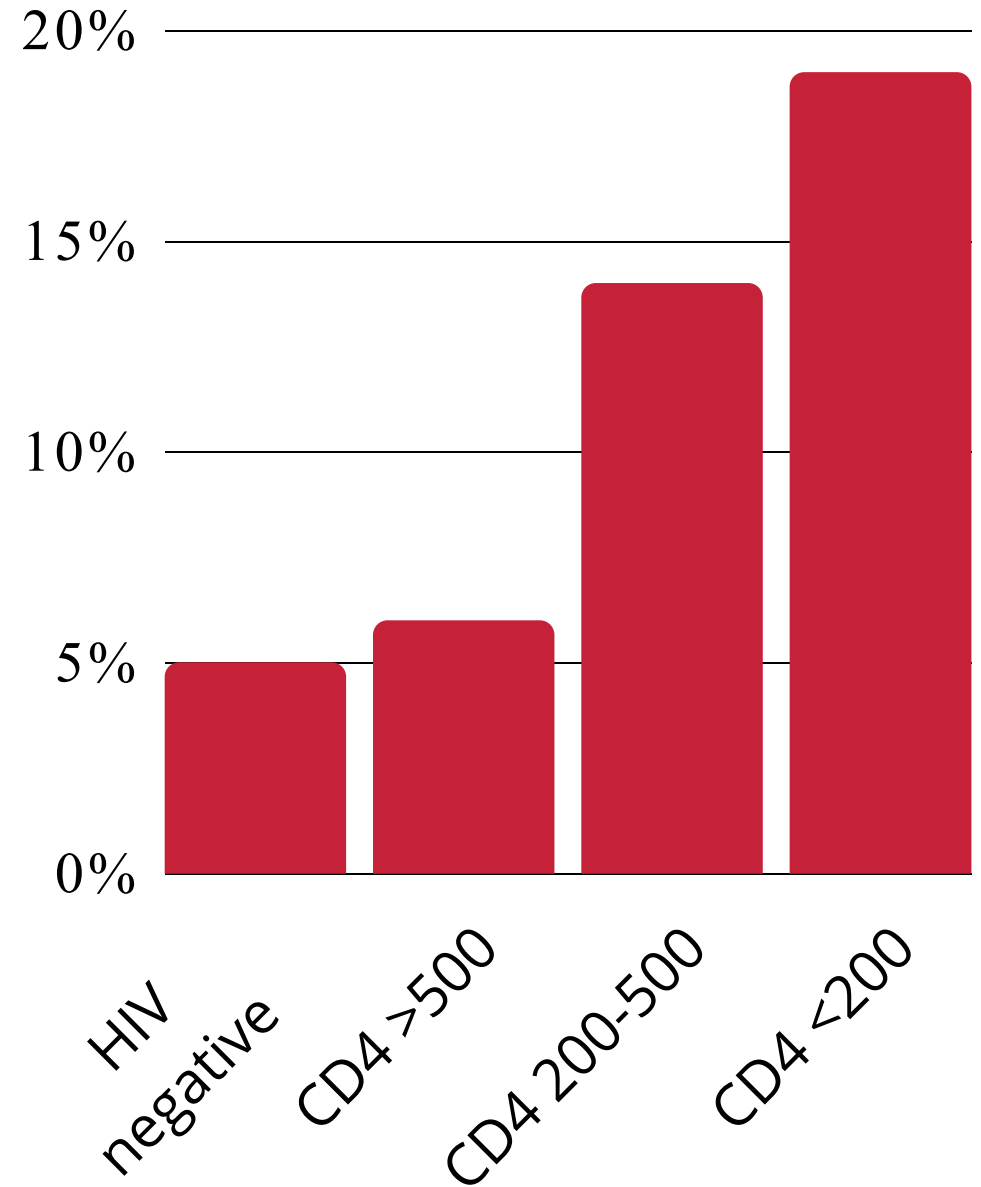

Making every contact count

Stopping contraception at menopause

Contraception	40-50 years	>50 years
Non-hormonal	2 years amenorrhoea	1 year amenorrhoea
CHC, injection	continue	switch at 50 years
IMP, POP, IUS	continue	stop at 55 years >50 years for FSH & stop at 1 year

Lower CD4 count increases risks at cervical screening

- Cytological abnormality
- Multi-focal intraepithelial neoplasia
- Persistent HR-HPV

Cervical screening

- Annual cervical screening 25-65 years
- HPV vaccination
- Symptom enquiry
- Ano-genital examination
- Colposcopy referral
- STI screen

Sexual dysfunction

Age

Mental health

Transmission
fear

HIV / ART
complications

Summary

- 1 Risks of unplanned pregnancy
- 2 Offer contraceptive choice
- 3 Make every contact count
- 4 Full examination at cervical screen
- 5 Give opportunities for discussion

Thank you!
