Conflict of Interest

In relation to this presentation I declare that I have no conflict of interest

Speakers are required by the Federation of the Royal Colleges of Physicians to disclose conflicts of interest at the beginning of their presentation, with sufficient time for the information to be read by the audience. They should disclose financial relationships with manufacturers of any commercial product and/or providers of commercial services used on or produced for patients relating to the 36 months prior to the event. These include speaker fees, research grants, fees for other educational activities such as training of health professionals and consultation fees. Where a speaker owns shares or stocks directly in a company producing products or services for healthcare this should also be declared. Finally, other conflicts of interest including expert functions in health care or healthcare guidance processes should be declared (eg if the professional is a member of a health board). The Federation considers it good practice to also make speakers' disclosures available in digital format(s) relating to the educational event.

What are Integrated Care Systems?

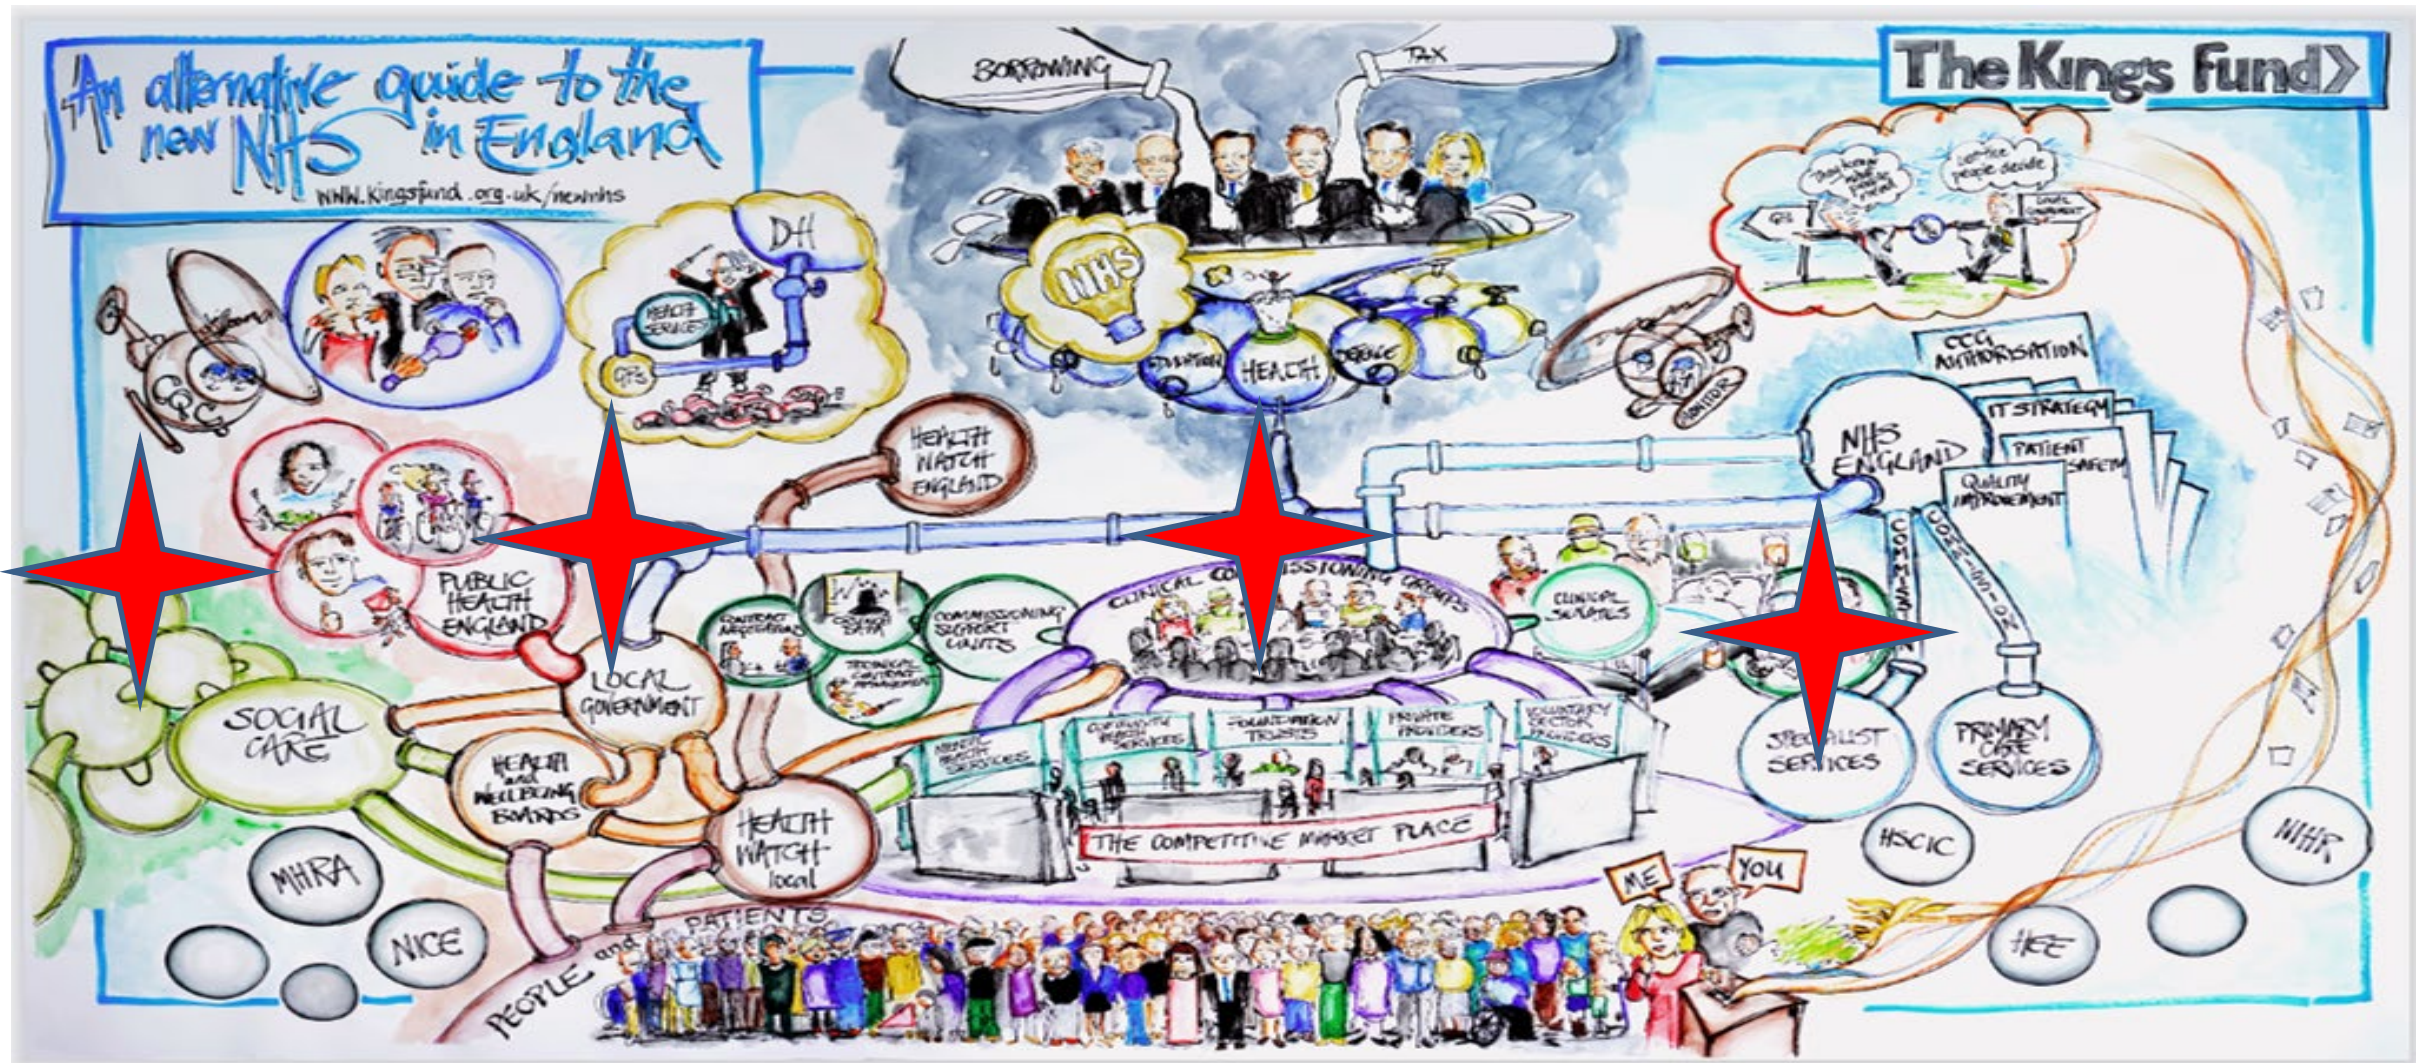

New health systems that integrate care across hospital, community, mental health and social care settings

Why do we need to know about this?

*Commissioning of HIV services will change
Likely to change the way we work in the future*

NO

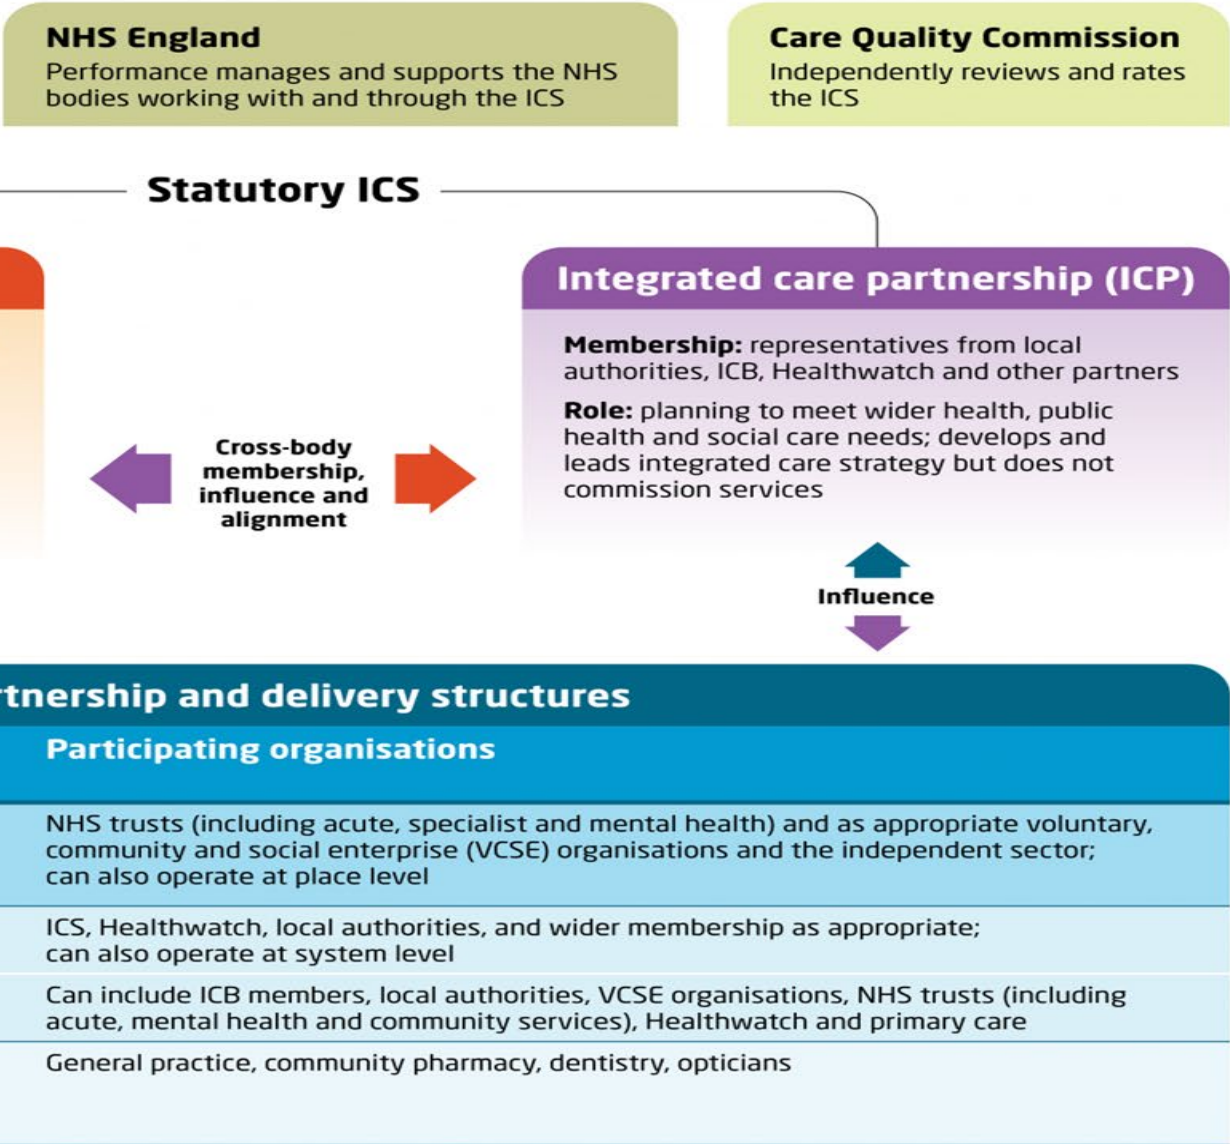

Health and Social care Act 2012: Competition, fragmented commissioning, Private Providers in the marketplace

Developing a health and care strategy

During the rest of 2022-23, we will be developing a strategy that sets out the priorities and the actions that we will be taking to improve the health and care of people living across Sussex.

The strategy will be overseen by the new Sussex Health and Care Assembly and its delivery will be supported by the new NHS Sussex and our place-based health and care partnerships.

We will be involving and engaging with our system partners, public and stakeholders in the development of the strategy to ensure it is co-designed in the best possible way that meets the health and care needs of our communities.

Over the coming months, for the rest of 2022, we will be undertaking formal and informal discussions across the system that will inform, shape and influence the future of health and care.

All partners will have an opportunity to input into this work and we will be carrying out public engagement to ensure the views and insight of our communities is heard.

Our journey together

Our journey together summarises our progress, where we want to get to and the next steps for 2021-22.

ICS annual report

Our ICS annual report provides an overview of the progress we have made across our system-wide programmes and collaboratives over the last year.

Sussex 2025: Our vision for a healthier future

Sussex 2025: Our vision for a healthier future sets out where we want to be as a health and care system in the future.

Sussex 2025: Vision to Reality – key deliverables

REDUCING HEALTHCARE INEQUALITIES

The Core20PLUS5 approach is designed to support Integrated Care Systems to drive targeted action in health inequalities improvement

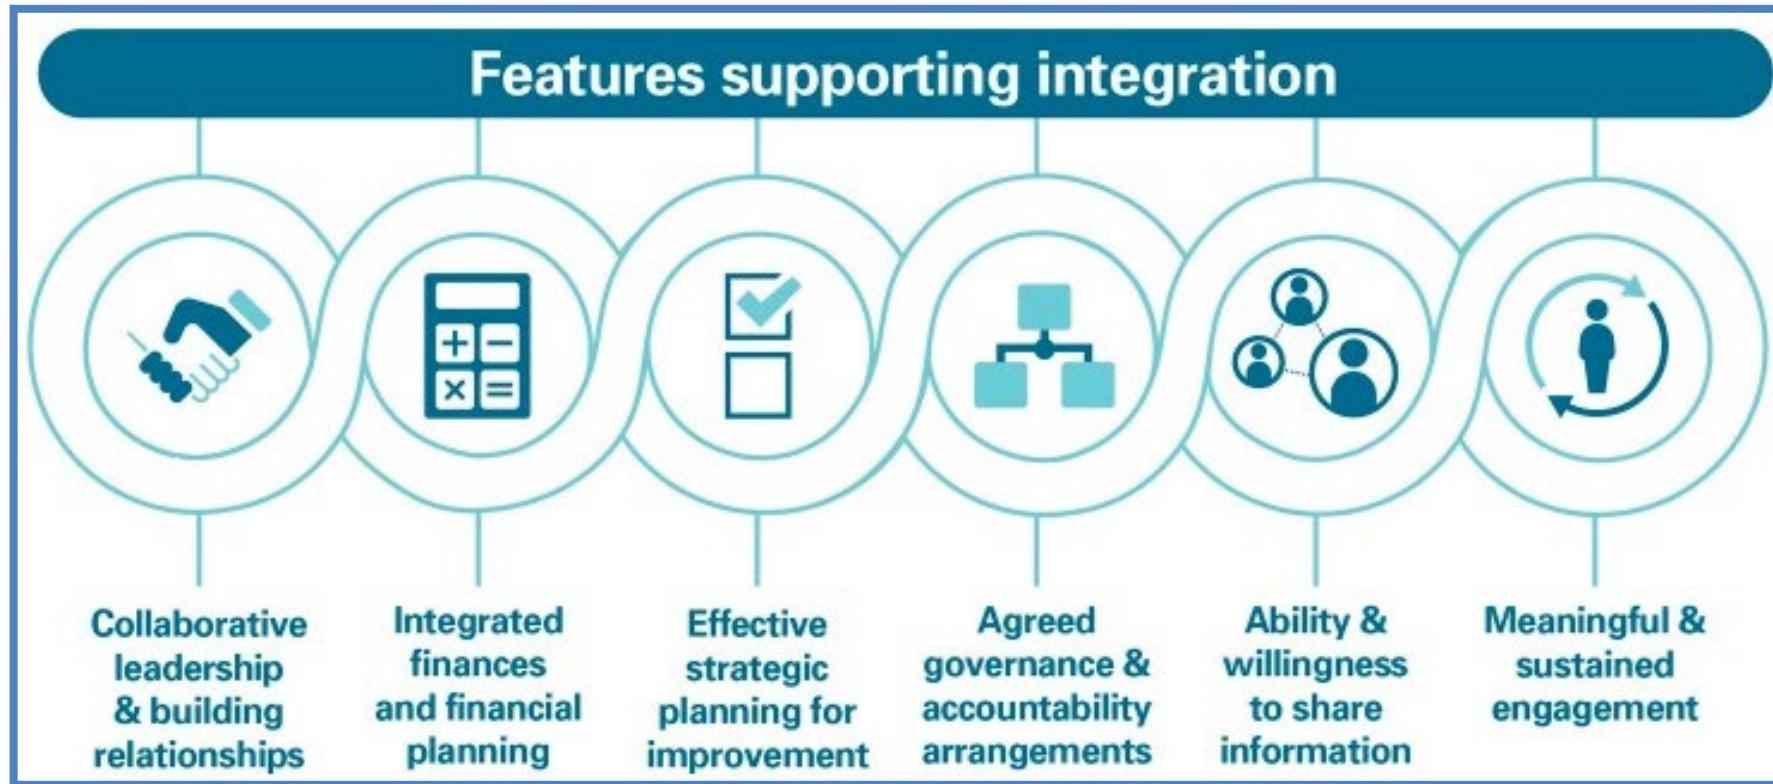

Wales – Integrated Care Fund

In place since 2014 focussing on priorities. Evaluation in 2021 shows:

- ☐ Improve partnership working
- ☐ Enhanced the role of the third sector
- ☐ Reduction in institutionalised care and use of hospital beds
- ☐ Contributed to many positive changes across health and social care delivery

Scotland

Integrated health and social care since 2016, reviewed 2019

Strengths

- Joining up care with e.g. mental health and social care
- Inclusion of voluntary and community sector (VCSE)
- HIV remains a prescribed specialist service – clear national steer on standards
- Clinical networks

Weaknesses

Opportunities

Threats

Strengths 	Weaknesses 
<ul style="list-style-type: none"> • Joining up care with e.g. mental health and social care • Inclusion of voluntary and community sector (VCSE) • HIV remains a prescribed specialist service – clear national steer on standards • Clinical networks 	<p>Highly complex structures</p> <p>Governance and accountability</p> <p>Transformation phase at present</p>
