Klick – the use of mobile technology (app) in nurse-led clinics as a tool of empowerment (and development) for nurses and patients.

Christina Antoniadi

Chelsea and Westminster Hospital

www.nhivna.org

Klick: the use of mobile technology in nurse-led clinics as a means of empowerment for patients and development tool for nurses

Christina Antoniadi, Chelsea and Westminster Hospital

Yodit Fissahaye-Yimer, Chelsea and Westminster Hospital

Presented on behalf of the core Klick team:

Sara Day, Rebecca Wilkins, Paul Holmes, Ruth Byrne, and [Caroline Rae](#)

Conflict of Interest

Christina Antoniadi:

I have received travel bursaries, conference registrations, compensation for reporting from conferences and participating in advisory boards from ViiV. I have participated in the production of peer support info-videos for Gilead.

Yodit Fissahaye – Yimer:

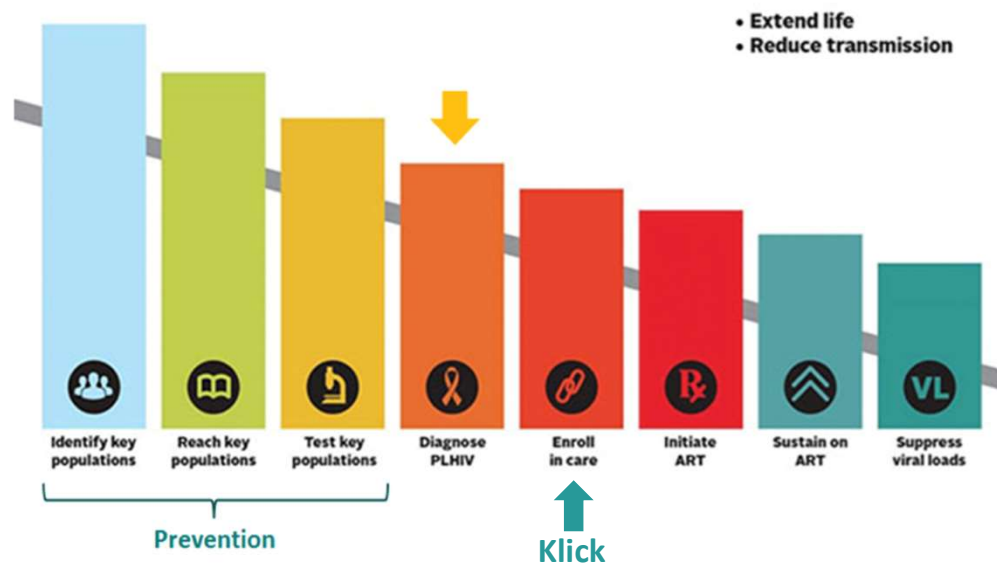

In relation to this presentation I declare that I have no conflict of interest

Speakers are required by the Federation of the Royal Colleges of Physicians to disclose conflicts of interest at the beginning of their presentation, with sufficient time for the information to be read by the audience. They should disclose financial relationships with manufacturers of any commercial product and/or providers of commercial services used on or produced for patients relating to the 36 months prior to the event. These include speaker fees, research grants, fees for other educational activities such as training of health professionals and consultation fees. Where a speaker owns shares or stocks directly in a company producing products or services for healthcare this should also be declared. Finally, other conflicts of interest including expert functions in health care or healthcare guidance processes should be declared (eg if the professional is a member of a health board). The Federation considers it good practice to also make speakers' disclosures available in digital format(s) relating to the educational event.

Care continuum and Klick

The HIV care cascade shows the various stages that a person diagnosed with HIV must go through, and the proportion of individuals engaged at each step.

Source: The LINKAGES program - Across the Continuum of HIV Services for Key Populations

Klick was designed with a focus on:

- **Patient Empowerment:** Involving PLWH in their care
- **Annual Health Review:** In line with current national guidance (as per BHIVA and NHIVNA guidance)
- **Nurse-led clinics:** Increased work-satisfaction and retention to work model, independent working, opportunities for development
- **Digital solutions:** Enhancing the service model, cost-effective, patient-centred care

Klick has been designed as an integrated pathway, enabled by technology to support the care provided for patients living with HIV

PATIENT EXPERIENCE

Patient registers on the Klick app – setting their Klick communication preferences re Push Notifications and Feedback Contact.

Via the Klick app: Patient books Klick appointments. Can reschedule/cancel appointments. Automated appointment reminders are sent.

Via the Klick app: 10 days before routine review appointment patient is asked to complete a pre-visit questionnaire.

The routine review consultation is done by a member of the Klick team. Medication needs are also addressed.

Via the Klick app: Patient receives their routine blood test results which have been reviewed by a member of the Klick team.

Via the Klick app: Patient books their next appointment.

Patients can also make an Emergency Script Request (1m supply) via the app.

STAFF EXPERIENCE

Klick Admin Team manually transfers Klick appointments to Cerner.

Keeping appointment information in synch across the app and Cerner is a challenge. Limits ability to extend the type of appointments we can offer via the app.

Klick Team reviews the completed questionnaire via the HealthMachine as part of clinical prep for the routine review appointment.

The routine review appointment is guided by the medical screener form accessed via the HealthMachine – ensuring all relevant information is captured.

The Klick Team reviews the results, applies a RAG rating and text putting those results into context for that patient including any relevant follow-up instructions/advice.

When an Emergency Script request is made via the app, an automated email is sent to an admin mailbox and requests are processed as any other emergency script request.

Patient-facing Klick app features

Chelsea and Westminster Hospital **NHS**
NHS Foundation Trust

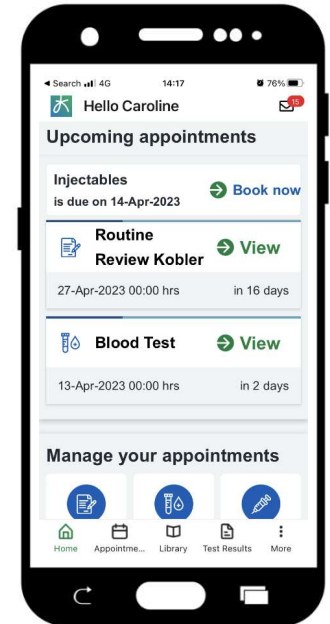

Book/reschedule/cancel appts
Injectable appointments
Appointment reminders and prompts

Submit a pre-visit questionnaire (PVQ) to influence consultation

View routine blood results
Receive secure care notifications from the clinical team

Request emergency prescriptions

general_wellbeing_group

How have you been since your last visit?

I have been well / no problems

I have been unwell and / or have problems

Please list any new medical or mental health conditions since your last visit.

Cluster headaches

State below if you have had any problems with your treatment since your last visit. *

GP started a statin and increased my blood pressure tablets

Doubles up as GP letter

Pre populated

Nurse prompts

1.1 Patient Profile

ARV Regimen

Treatment related problems:

Safeguarding alert

Last CD4 Result and Date

Last VL result and date show on EPR

Viral load status reported by patient via triage process (suppressed 9 months)

1.2 Patient History

Co-morbidities / PMH
 HIV +ve
 Depression
 Dyslipidaemia
 Low libido
 Asthma

1.3 Co-medications

Co-medications

Allergies

Medical Pro forma

Patient Profile:

- Past medical history
- Concurrent medication
- Possible problems/side effects

Wellbeing_1:

- Alcohol and RDU
- Biometric data
- Mood and support

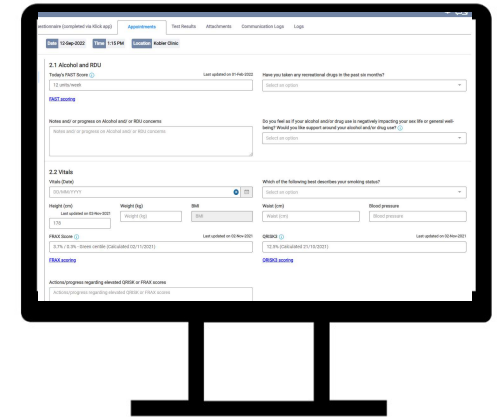

Wellbeing_2:

- Sexual Health
- Women's Health
- Vaccinations

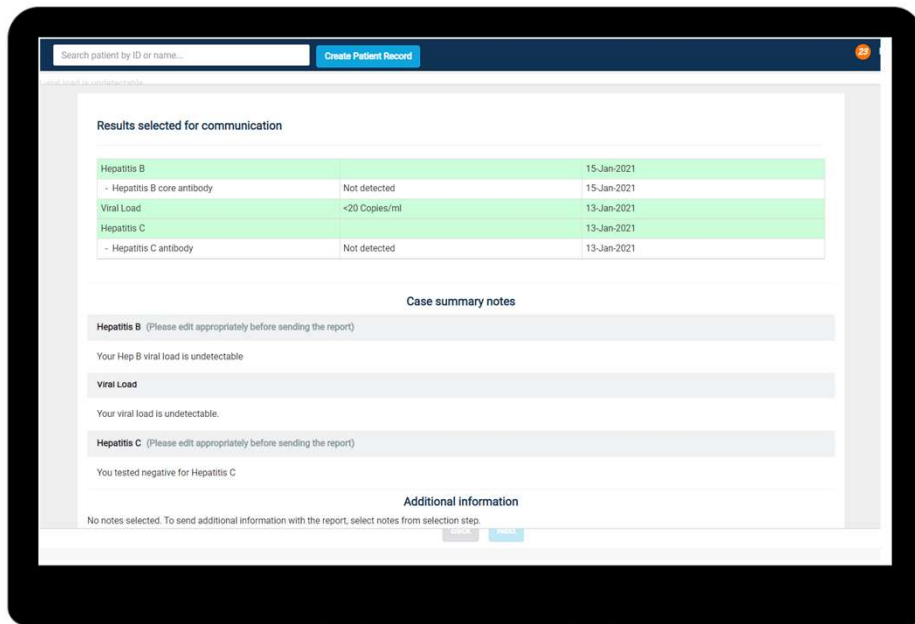

Wellbeing_3:

- Consultation
- GP letter

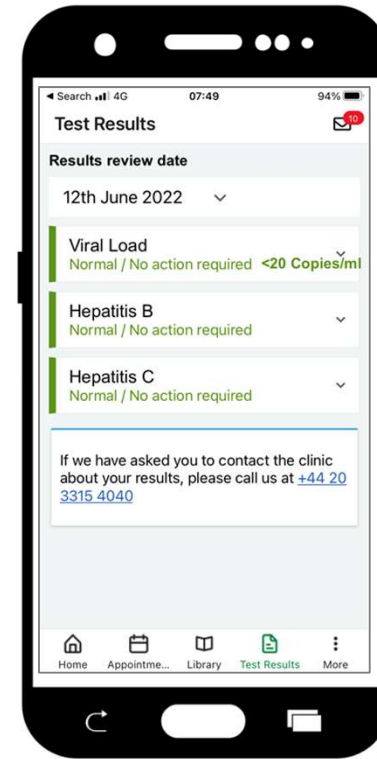

Results released/published on app via Health Machine

NHIVNA Band 6 outpatient service

Manages and supports own caseload of clinically stable patients
Telephone, email clinics
Adherence, toxicity
Psychological and sexual health
Uses supervision effectively

Who do we refer to?

Women

- Women clinic
- Menopause clinic
- Sexual Health Clinic for smear test

Physical Wellbeing

- Dietician
- Physiotherapy
- Gym support through charities

Sexual Wellbeing

- Sexual health clinic
- Anoscopy clinic
- Contraception
- Erectile dysfunction clinic

Psycho-Social wellbeing

- Peer Support
- Mental Health/HIV CNS
- Psychological service
- Community organisations

Co-morbidities

- Cardiology clinic
- TB clinic
- Hepatology clinic
- Neurology clinic
- Over 50s
- Metabolic clinic

GP

- Coordination of care
- Referrals to other specialties
- Vaccinations
