Conflict of Interest

In relation to this presentation I declare that I have no conflict of interest

Speakers are required by the Federation of the Royal Colleges of Physicians to disclose conflicts of interest at the beginning of their presentation, with sufficient time for the information to be read by the audience. They should disclose financial relationships with manufacturers of any commercial product and/or providers of commercial services used on or produced for patients relating to the 36 months prior to the event. These include speaker fees, research grants, fees for other educational activities such as training of health professionals and consultation fees. Where a speaker owns shares or stocks directly in a company producing products or services for healthcare this should also be declared. Finally, other conflicts of interest including expert functions in health care or healthcare guidance processes should be declared (eg if the professional is a member of a health board). The Federation considers it good practice to also make speakers' disclosures available in digital format(s) relating to the educational event.

“The authors are taking peer support to a new level. The roadshows engage with other groups to share their experience and the processes used in creating the book and holding the line on narrative ownership. They are saying: you can do this: and this is how, and this is why it is important to tell your story. Not our story but **your story.*

Our Stories pulls together the therapeutic and social aspects of narration but is also a gift to others in the application of accessing the successful route into advocacy and activism”.
