THE FUTURE OF HIV CARE  
SHOULD BE  
PRIMARY CARE LED

HOLISTIC CARE  
PATIENT  
CHRONIC DISEASE  
COLLABORATION

## HOLISTIC CARE

### Social

Family  
Housing  
Job  
Support  
Coping Mechanisms  
Community

### Multidisciplinary Team

Outreach  
Community Teams

## PATIENT

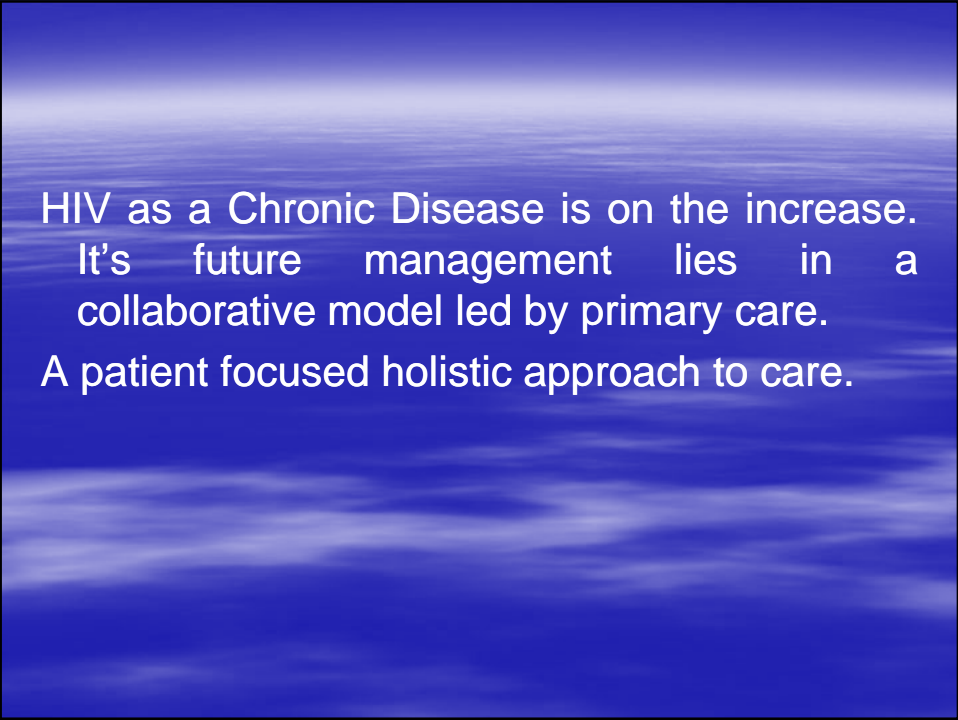

Primary Reason  
Personal Touch  
Waiting Room  
Seen for Other Things  
Facilitation  
Flexible

## CHRONIC DISEASE

- Increase in Numbers
- Increase NHS Costs
- Screening
- Drug Monitoring
- Compliance
- Lifestyle/Wellbeing

## COLLABORATION

Key to Success

HIV as a Chronic Disease is on the increase.  
It's future management lies in a  
collaborative model led by primary care.  
A patient focused holistic approach to care.
